ParaLoc™ Non-Pressure Holders

ParaLoc Non-Pressure Holders come in standard die casing dimensions and include a locking cap to provide security against the insert backing out of the casing.

ParaLoc™ Non-Pressure Holders

Paramount Die Company's ParaLoc Non-Pressure Holders come in standard die casing dimensions and include a locking cap to provide security against the insert backing out of the casing. As the precise taper tolerance on the insert generally provides adequate holding power, this option is only required in situations where excessive back tension may pull the insert out of the casing.

Key Benefits:

- Precision manufactured from the highest quality stainless steel.
- Provides an alternative insert holder if the pressure holder exceeds die box limitations.
- Generates less lubricant carry-through than the ParaLoc Pressure System.
- Locks the drawing insert into place for the machines that have excessive back tension.
